## SUMMARY

I'm currently starting in software development by going through a bootcamp at Southern Methodist University where I received my certificate in Full Stack Web Development. In that program I have learned how to create various applications. In that that time I learned the importance of writing readable and maintainable code. I continue to further myself by learning new technologies and improve as a developer in a fast-changing industry.

## Work History

### **Toyota Parts Associate – 2021 to present**

Now I manage car parts in a warehouse at a dealership. My responsibilities include receive shipment, manage inventory, and occasional pick up or deliver parts.

### **YMCA Head Lifeguard – 2016 to 2020**

Started when I was 16 when I did my training to become a lifeguard I initially made sure all patrons were safe, over time I gained more responsibilities by teaching people how to swim in all age ranges, then gained a leadership role of making sure the lifeguards who I was working with are prepared, and if anything were to happen I would take charge of the situation and resolve it.

## Education

High school Diploma graduated in 2017

Associate of Arts- 2022

SMU Full Stack Development certificate 2023

## Skills

- Spanish Proficient
- CSS
- HTML
- JAVA
- MYSQL
